

DO NOT negate or block the Wisconsin Do-Not-Call List. The way this law is written is what Wisconsin voters and consumers want. We're all sick and tired of getting unsolicited calls from individuals trying to high pressure sell unasked for and unsolicited items. I actually would go so far as to hope that at some point the law could be adjusted to include charitable, survey, and non-profit organizations as well. These calls are just as annoying. There are other media methods to get their pleas to the public, my telephone does not have to be their source.
